Our Vision Our Mission

Our mission is to Make Lives Better and to improve and extend people's lives by providing high quality, affordable and innovative healthcare products to patients.

Our Vision is to be a global integrated healthcare leader with presence across the globe and to be a trusted brand amongst patients and healthcare providers.

As a part of a healthcare industry, we have a commitment to the communities we serve and in turn to the human race in itself. We have been privileged to play a role in helping millions of people to stay healthy. We take pride in taking our products, services and ideas to the maximum geographies as possible, which is a long journey; we will continue to embark on.

Letter from CEO

Dear Doctor,

We are extremely overwhelmed and humbled by your warm acceptance. We believe to take this forward and embark a new journey of a long lasting relationship.

I take great pleasure in introducing ourselves. We are Elbrit Life Sciences Pvt. Ltd. We are a part of global business group based in UK, India and Middle East with our primary interests in healthcare, education, FMCG, textiles and construction. We are a futuristic group and have always invested in future technologies which will transform lives globally.

It has been an amazing journey so far. Launched in 2014, we have grown tremendously and received great patronage from healthcare community. We have set up a dedicated WHO-GMP approved manufacturing, which caters to domestic and international markets. Operating across 50 regions in South and Central India, we market more than 50 brands. We contract manufacture and export for some leading international brands.

New initiatives will infuse us with new energy. Expanding our geographical footprints in the domestic market is one such initiative, which we want to embark this year. Our other initiative is to enhance our portfolio of innovative products and First in India products.

Quality and Innovation is at the heart of everything we do. Our commitment starts at research laboratories, manufacturing facilities and concludes at marketing and brand engagement. But we do not stop there; we incorporate them into our organizational culture, serving our customers and patients in every single action we take.

As we take our next step in the domestic pharmaceutical market to fulfill our grand vision 2021, we expect your esteemed blessings and valuable support from you.

Prakash
Chief Executive
Elbrit Life Sciences Pvt. Ltd.,

State of the art WHO GMP Manufacturing Facility

Elbrit's State of the art manufacturing facilities are GMP compliant and are in conformity with domestic and international standards. Majority of our brands are manufactured at our in house facility. Our facilities are under process of getting approved by UKMHRA, EUGMP and various other countries.
